Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-11 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of copending Application No. 10/718,295. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are drawn to a photothermographic image material and corresponding method of forming an image

therefrom, said material comprising: an organic silver salt; a photosensitive emulsion containing photosensitive silver halide grains; a silver ion reducing agent inclusive of the instant formula (A-3); a binder; and a cyan coloring leuco dye, wherein a percentage of the photosensitive silver halide grains having a mean particle size of 10nm or more and 40 nm or less.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. Claims 1-11 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of copending Application No. 10/806,841. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are drawn to a photothermographic image material and corresponding method of forming an image therefrom, said material comprising: an organic silver salt; a photosensitive emulsion containing photosensitive silver halide grains; a silver ion reducing agent inclusive of the instant formula (A-3); a binder; and a cyan coloring leuco dye, wherein a percentage of the photosensitive silver halide grains having a mean particle size of 10nm or more and 40 nm or less.
